

USER MANUAL

Trail Camera SN-Jakt-Cam

1. Unpack the product

Carefully unpack the camera and all accessories from the box. Ensure that all parts are present and undamaged.

2. Install the antenna

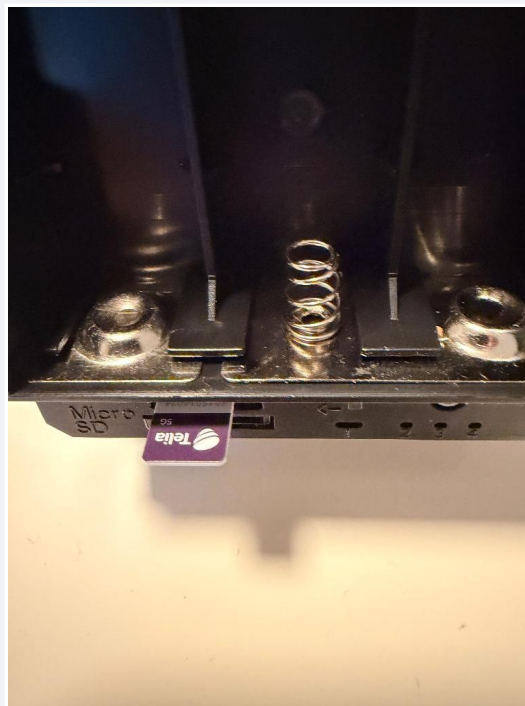

Install the antenna on the device by screwing it firmly onto the threaded connector on the side. This is crucial for signal strength and data transmission.

3. Insert the SIM card

Insert the SIM card with the chip facing downwards. Press the card in until you feel it click into place.

Important: Ensure the SIM card has an active data plan and that there is mobile coverage at the location where the device will be installed.

4. Insert the memory card

Insert a MicroSD card into the slot. To ensure images are successfully transferred to the cloud, the memory card must be at least **Class 10**.

5. Install batteries

Insert the batteries into the compartment. Ensure they are fully charged before use. The camera requires **3 x 18650 batteries**.

6. Prepare the App

Download and install the **SiGN** app on your smartphone via the App Store or Google Play.

7. Turn the camera ON

Slide the power switch to the **ON** position.

8. System Check and Connectivity

The device has three lights (green, blue, and red) that will blink initially. Once the camera has found a signal, it will switch to blinking only green, and then stop blinking once the connection is stable.

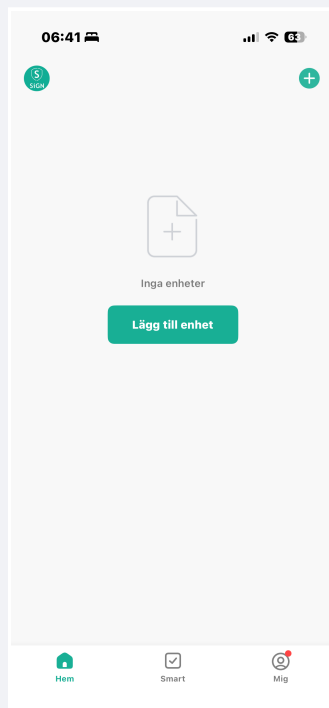

9. Pair the device with the App

Follow these steps to link the camera to the SiGN app:

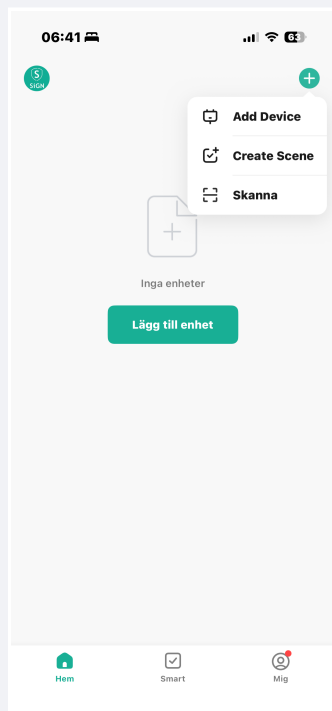

9.1 Open the App

Open the SiGN app and tap the **plus sign (+)** in the top right corner.

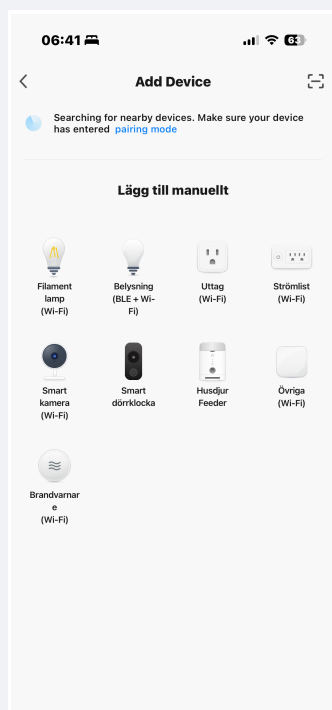

9.2 Add Device

Tap the **Add Device** button.

9.3 Open Scanner

Tap the **scanner icon** in the top right corner of the screen.

9.4 Scan QR Code

Scan the **QR code** located on the inside of the battery cover. It may take up to 2 minutes for the device to establish contact with the app.

Your SiGN trail camera is now installed. Good luck with your wildlife monitoring!
